

## CASHLESS PAYMENTS

Our cashless payment system can greatly limit or eliminate on-site cash handling, reducing potential loss and providing valuable insight into food and beverage sales. Visitors can top up money on their wristbands prior to the start of the event. And during the event automated top-ups can also be authorized making queuing at ATMs no longer necessary. The PlayPass cashless payments system runs completely offline to ensure constant cashless transactions. Online connection, however, is required for real-time reporting.

## FEATURES AND BENEFITS

- Online, Offline or a combination of both
- Closed or open loop system or a hybrid of both
- Reducing transport and counting of cash and/or tokens on site
- Real-time reporting of all bar sales
- Stolen or lost wristbands can be cancelled whereby balances can be transferred
- Different price matrix are applicable (per zone, per bar) Customer balance checking options
- Paypal integration

## ACCESS CONTROL

From standard tickets to RFID wristband scanning. To manage public entrances and/or to streamline the entrance flow to specific areas such as VIP-decks, backstage, alcohol-restricted areas or artist's village.

Eliminate ticket fraud, guarantee a smooth entrance flow and get real-time insight into the exact number of attendees on site.

## FEATURES AND BENEFITS

- Barcode scanning, QR code, RFID and NFC or eID
